

Customised Hydraulic Presses

Closed Frame Presses ('H' Frame)

Capacity 10 - 2000 ton

500 ton Metal Forming Press
(Ship building industry)

Features

- Press frame structures, cylinders and power packs are precision engineered in design and construction.
- Press frames thermally stress relieved based on application.
- Precision machined to maintain alignment of the moving frames under operating loads.
- Based on the type of press and application, guiding arrangements are provided.
- Hydraulic and electrical elements of reputed make to ensure trouble free operation and productivity.

100 ton Hydraulic Roll Bed Press
(Hydraulic travel of cylinder & frame)

800 ton Forming Press
(with hardened wear plates)

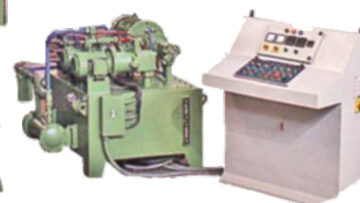

100 ton Hydraulic Roll Bed Press
(Manual travel of cylinder & frame)

20 ton Push Fitting Press

250 ton Semi-Automatic Moulding Press
(Hydraulic table travel, Electrically hardened plated)

CUSTOMISED PRODUCTS

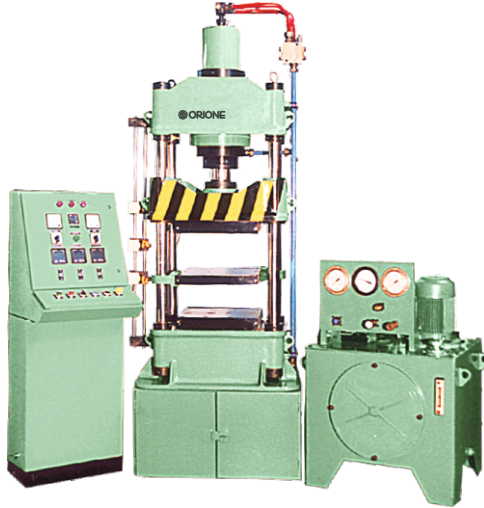

Customised Hydraulic Presses

Tie-Rod Presses

Capacity 5 - 200 ton

20 ton Lab Press
(Electrically heated platen)

50 ton Semi Automatic Double Daylight Press
(Electrically heated platen)

600 ton Semi Automatic Moulding Press
(Electrically heated platen)

Open Throat Presses ('C' Frame)

Capacity 5 - 200 ton

100 ton 3 Station Indexing Press, Semi Automatic For Tamarind Cube

150 ton Metal Forming Press

Horizontal Presses

400 ton Horizontal Press
(Steel plant - shaft dismantling)

100 ton Semi Automatic PLC Metal Forming Press
(With Electronic pressure and stroke control)
